

Bowman Style Rodent Restrainer

Restrainer usable on a variety of animals on a diverse weight range and providing easy access of the entire body - Especially used for obesity studies

Product codes:

Reference: POR-530

Product description:

The Bowman restrainer has been re-engineered and refined to accommodate larger sized animals up to 750 grams. The positions of the stainless steel rods around the rodent provide easy access for many types of research applications, especially obesity studies.
