

Air pump

Provides a regular air flow for rodent anesthesia machine

Product codes:

Reference: R510-29

**Product description:**

This air pump compresses the ambient air, generating air pressure. The air obtained can then be used by the anesthesia system.

Product features:

Weight: 2,7 kg
Dimensions: 24x22x20 cm
Power supply: 220-240VAC
Flow rate: 20L / min
Working pressure: 30Kpa
Frequency: 50 Hz
